

BARIALink

In 2016 Dr. Dillemans started the BARIAlink Academy to create a network of skilled surgeons to teach surgical excellence. The primary aim and purpose of the Academy is to share and to discuss, on a high professional level, complex bariatric and obesity surgery cases with interested bariatric surgeons during a two hours videoconference in collaboration with colleagues from all over the world.

Case 2 - Dr. Vito - Anastomotic leak at postoperative day 16

Anastomotic leak at day 16

If we had seen the incisional hernia during the first surgery, would we need to close the hole ????
